Summarising biometrics from the SAFRING database for southern African birds

Rose, Thomson, Oschadleus and Lee

Table S2: Subset of 70 southern African bird species for which there was insufficient ringing and retrap records in the SAFRING database to yield biometric summaries. These species are highlighted because several are either endemic or relatively common and could therefore be important candidates for future research. ADU number = number assigned by the Animal Demography Unit at the University of Cape Town, South Africa. Mass (g) = mean value of weights entered in the database.
