Special Issue: Citizen Science

Summarising biometrics from the SAFRING database for southern African birds

Rose, Thomson, Oschadleus and Lee

Table S1: Summary of available biometric data for 674 bird species in the SAFRING database, extracted between July–November 2018. ADU number = number assigned by the Animal Demography Unit at the University of Cape Town, South Africa; *N* = total number of ringing and retrap records in the database per species; *n* = number remaining after data cleaning and validation, *lq* = lower quartile, *uq* = upper quartile. Biometrics included were: mass (g), wing length (mm), tarsus length (mm), culmen length (mm), tail length (mm) and head length (mm). Sex-specific size differences were noted as ‘Yes’ or ‘Unknown’ and are further summarised in Table S3.

Order	Family	ADU number	English	Latin	Metric	lq	uq	Mean	SD	<i>n</i>	<i>N</i>	Sex difference
Anseriformes	Anatidae	95	African Black Duck	<i>Anas sparsa</i>	Mass	726	1228	977.6	156.3	105	208	Yes
