(Coleoptera: Scarabaeidae, Coprini)

Table S2. The number of stridulation types observed in *C. lunaris*. Incomplete stridulations with only subunit A present (*sA*), incomplete stridulations with only subunit B present (*sB*), and complete stridulations where both subunits were present (*sAB*). Groups were classified as females (f), minor males (m^{*}), and major males (m[°]). At the bottom part of the table, the overall mean \pm standard deviation of each group was reported.
