

Supplemental Table S2. Table showing the results of predicted cellular targets of protein products. Predictions were made using the algal-specific tool, PredAlgo. Provided are computed scores for putative presence in mitochondria (Mit), chloroplasts (Chl), or the extracellular environment (Secretory Pathway, SP).

Species	Protein ID	Target	Mit	Chl	SP
<i>Pseudo-nitzschia multistriata</i>	VEU40048.1	C	0.89	1.27	0.89
<i>Phaeodactylum tricornutum</i>	Phatr3_EG00333	SP	0.03	0.02	0.70
<i>Chlamydomonas reinhardtii</i>	AAB97101.1	SP	0.01	0.01	1.64

Predictions were made using the algal-specific tool, PredAlgo. Provided are computed scores for putative presence in mitochondria (Mit), chloroplasts (Chl), or the extracellular environment (Secretory Pathway, SP).
