

Supplementary Information

Allometric models for height and aboveground biomass of dominant tree species in South African Mistbelt forests

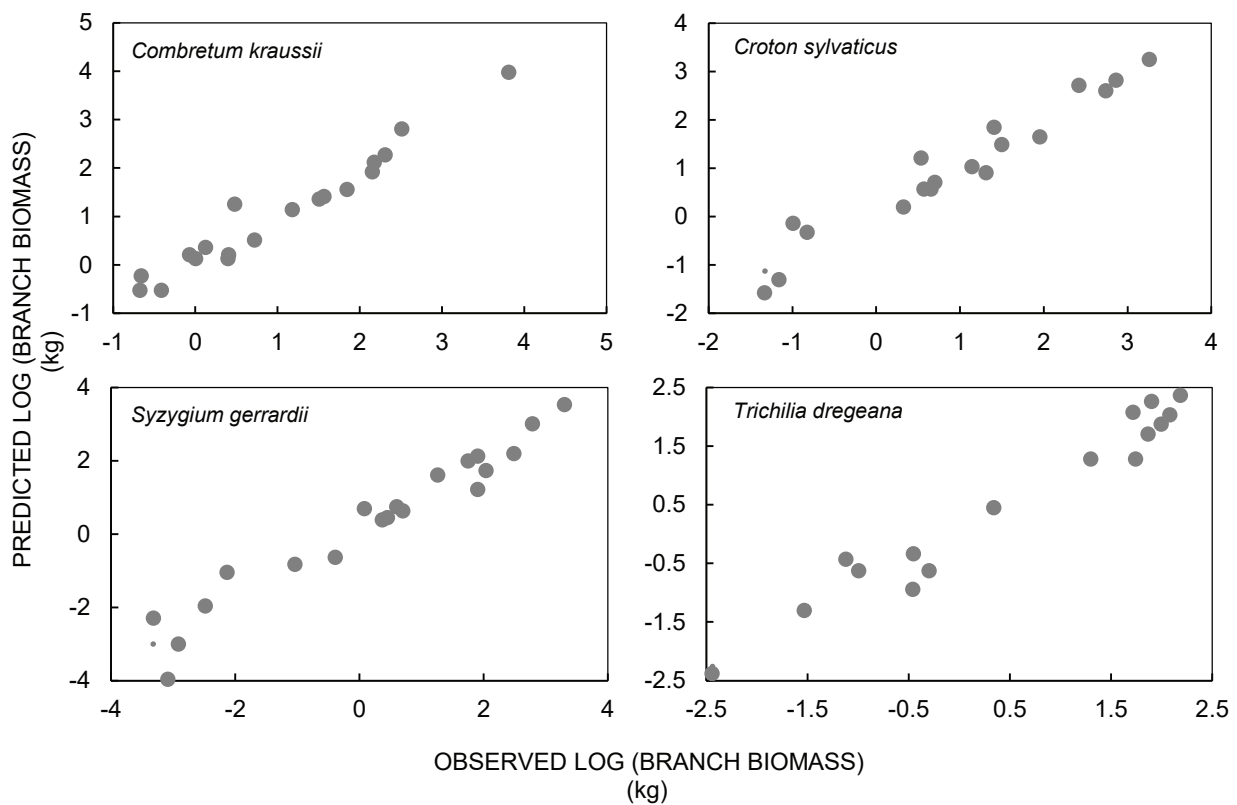

Sylvanus Mensah, Ruan Veldtman and Thomas Seifert

Southern Forests 2016, 79(1): 19–30. <http://dx.doi.org/10.2989/20702620.2016.1225187>

Supplementary Figure S1: Predicted vs observed values of height (m) for each species

Supplementary Figure S2: Predicted vs observed values of branch biomass (kg dry mass) for each species

Supplementary Figure S3: Predicted vs observed values of aboveground biomass (kg dry mass) for each species
