

Supplemental table 2: Details of stillbirth in the ICP and non-ICP groups with twin pregnancies

No	ICP	The diagnosis GW of stillbirth	Chorionicity	Main information of the stillbirth
1	Severe	35	DCDA	BW=2470g, male,
2	Severe	34	DCDA	BW=2175g, female, complicated with anemia
3	Mild	34	DCDA	BW=2260g, female, complicated with pre-eclampsia
4	Mild	33	DCDA	BW=1940g, male, complicated with gestational diabetes mellitus
5	Mild	35	DCDA	BW=2058g, female
6	None	32	MCDA	BW=1570g, male, complicated with pregnancy induced hypertension
7	None	31	DCDA	BW=1305g, female, complicated with gestational diabetes mellitus
8	None	30	DCDA	BW= 1420g,female,
9	None	31	DCDA	BW=1258g, female, complicated with pre-eclampsia
10	None	28	MCDA	BW=980g, female
11	None	33	DCDA	BW=2022g, male
12	None	35	DCDA	BW=1820g, female, complicated with placenta abruption
13	None	32	DCDA	BW=2000g, male, complicated with gestational diabetes mellitus
14	None	32	DCDA	BW=2150g, male, complicated with pre-eclampsia
15	None	27	DCDA	BW=750g, male, complicated

				with hyper-thyroidism
16	None	26	Unidentified	BW=740g, female,
17	None	31	DCDA	BW=1670g, female, complicated with pre-eclampsia
18	None	29	MCDA	BW=1640g, male
19	None	32	DCDA	BW=1668g, male, complicated with pregnancy induced hypertension
20	None	34	DCDA	BW=2425g, male, complicated with gestational diabetes mellitus

ICP, intrahepatic cholestasis of pregnancy. GW, gestational week. BW, birthweight.

DCDA, dichorionic diamniotic. MCDA, monochorionic diamniotic.
