

Fig. S2. Western blotting to investigate the effects of AZC_3265 deletion on RGS·His₆-PraR expression. Whole cell lysates from the WT, *rgs·his₆-praR*, and *rgs·his₆-praRΔAZC_3265* strains grown in the BD medium at 26 °C were electrophoresed. RGS·His₆-PraR was detected by using the anti-His₅ antibody (Qiagen). This experiment was performed as described previously (Matsuoka *et al.* 2017).
