

**Supplementary Table 1** showing that for all combinations of estrogenreceptor (ER) status and HER2 status, samples with high as well as low values of tumour-infiltrating lymphocytes (TILs) were found, though ER+/HER2- were found to have a lower mean TILs value than the other subgroups

Tumour-infiltrating lymphocytes (TILs) in breast cancer subgroups				
	<b>N</b>	<b>%</b>	<b>Mean TILs (95% CI)</b>	<b>Range of TILs</b>
<b>ER+/HER2-</b>	81	69	0.13 (0.10-0.16)	0.03-0.82
<b>ER+/HER2+</b>	24	20	0.23 (0.15-0.31)	0.04-0.78
<b>ER-/HER2+</b>	11	9	0.27 (0.18-0.36)	0.05-0.52
<b>ER-/HER2-</b>	2	2	0.45 (n.e.)	0.08-0.83
