EXPLANATION: Thirty-eight detailed Land Use and Land Cover (LULC) classes were identified using manual interpretation techniques, aerial photographs, digital orthophotoquads, historical maps, and other available information. This area covers approximately 660,260 hectares of the Colorado Front Range (including the cities of Boulder, Fort Collins, and the City and County of Denver) for 1937,1957, 1977, and 1997.
