

Supplementary Figure S6. Gene expression signature of *M. tuberculosis*- specific genes. (A) For all of *M. tuberculosis*- specific genes. (B) Part for up-regulated *M. tuberculosis*- specific genes, another Part for these genes of *M. tuberculosis*, *M. shigaense* and *M. triplex* compared with mock group. The colors denote log2FC of genes expression. HPI has the same meanings with Figure 5.
