

Supplemental Figure 2. Soil-to-plant transfer factors of radioactive Cs among 11 sorghum accessions cultivated in 2012.  $[Cs]_{\text{plant}}$  and  $[Cs]_{\text{soil}}$  indicate total activity concentration of radioactive  $^{134}\text{Cs}$  +  $^{137}\text{Cs}$  in leaf and soil, respectively. The numbers on the x axis correspond to the accessions in Table 1. The accessions in this figure are the same as those in Figure 4.
