3 Prescribed drug resource use is given as N/A (not available), as the Swedish Prescribed Drugs Register does not
 4 provide information on the amount or dosage of drugs purchased. CI: confidence interval; CS: carcinoid
 5 syndrome; SSAs: somatostatin analogs. All p values were calculated using the Mann-Whitney U test for
 6 continuous variables, Fisher's exact test for dichotomous variables, or Chi-square test for non-ordered categorical
 7 variables, assuming a two-tailed test of significance, and conducted at the $\alpha=0.05$ significance level.
