

WATER IN CZECH TOWNS

The following towns have been selected: 77 district municipalities and 22 other towns in the order of their population + 1 town of the name Vodňany that by its name (water town) directly refers to the topic of the study. The towns are presented as covering an equal area. The colour of each town corresponds to the representation of blue areas per capita according to the above mentioned scale.

Blue points and numbers below the town names refer to the percentage of blue area in a town – one point [•] is 0.5 %. A number indicates the precise value of the proportion of the blue areas in %.

The towns consisting of more parts are presented regardless of the geographical location of their individual parts that are presented separately but adjoining the central part in such a way that a town can be placed in a regular grid without big spaces.
