**Supplementary Table 1. Weighted kappa ( $\kappa$ ) statistics and two-way mixed interclass correlation coefficients (ICC) of agreement between the two attending physicians (n = 75).**

| Parameter                              | Before the rounds  |                    | After the rounds   |                    |
|----------------------------------------|--------------------|--------------------|--------------------|--------------------|
|                                        | $\kappa$           | ICC                | $\kappa$           | ICC                |
| Mini-CEX                               |                    |                    |                    |                    |
| Medical interviewing                   | 0.478 <sup>†</sup> | 0.650 <sup>†</sup> | 0.262*             | 0.418*             |
| Physical examination                   | 0.350 <sup>†</sup> | 0.522 <sup>†</sup> | 0.470 <sup>†</sup> | 0.643 <sup>†</sup> |
| Humanistic qualities / Professionalism | 0.411 <sup>†</sup> | 0.627 <sup>†</sup> | 0.366*             | 0.539 <sup>†</sup> |
| Clinical Judgment                      | 0.453 <sup>†</sup> | 0.553 <sup>†</sup> | 0.306*             | 0.472*             |
| Counseling                             | 0.465 <sup>†</sup> | 0.638 <sup>†</sup> | 0.449 <sup>†</sup> | 0.622 <sup>†</sup> |
| Organization / Efficiency              | 0.327*             | 0.496 <sup>†</sup> | 0.318*             | 0.486*             |
| Overall clinical competence            | 0.400 <sup>†</sup> | 0.575 <sup>†</sup> | 0.400 <sup>†</sup> | 0.575 <sup>†</sup> |
| P-MEX                                  |                    |                    |                    |                    |
| Doctor-patient relationship skills     | -                  | 0.688 <sup>†</sup> | -                  | 0.408*             |
| Reflective skills                      | -                  | 0.487*             | -                  | 0.256*             |

\*:  $p < 0.05$ , <sup>†</sup>:  $p < 0.001$   
 $\kappa$ : kappa; ICC: interclass correlation coefficients; Mini-CEX: mini-clinical evaluation exercise; P-MEX: professionalism mini-evaluation exercise
