

Avocado rootstock influences scion leaf mineral content

Silit Lazar, Amnon Haberman, UriYermiyahu, Ran Erel, Eli Simenski and Arnon Dag

Table S1. Rootstock details.

Rootstock	Type	Propagation
VC28	WI	Clonal
VC55	WI	Clonal
VC68	WI	Clonal
VC140	WI	Clonal
VC159	WI	Clonal
VC207	WI×Mex	Clonal
VC320	WI	Clonal
VC801	WI	Clonal
VC802	WI	Clonal
VC804	WI	Clonal
VC840	Mex	Clonal
Dusa	Mex×Gu	Clonal
Degania 62	WI	Seed
Degania 189	WI	Seed
Nachlat 3	WI	Seed

WI – West Indian; Mex – Mexican; Gu – Guatemalan.

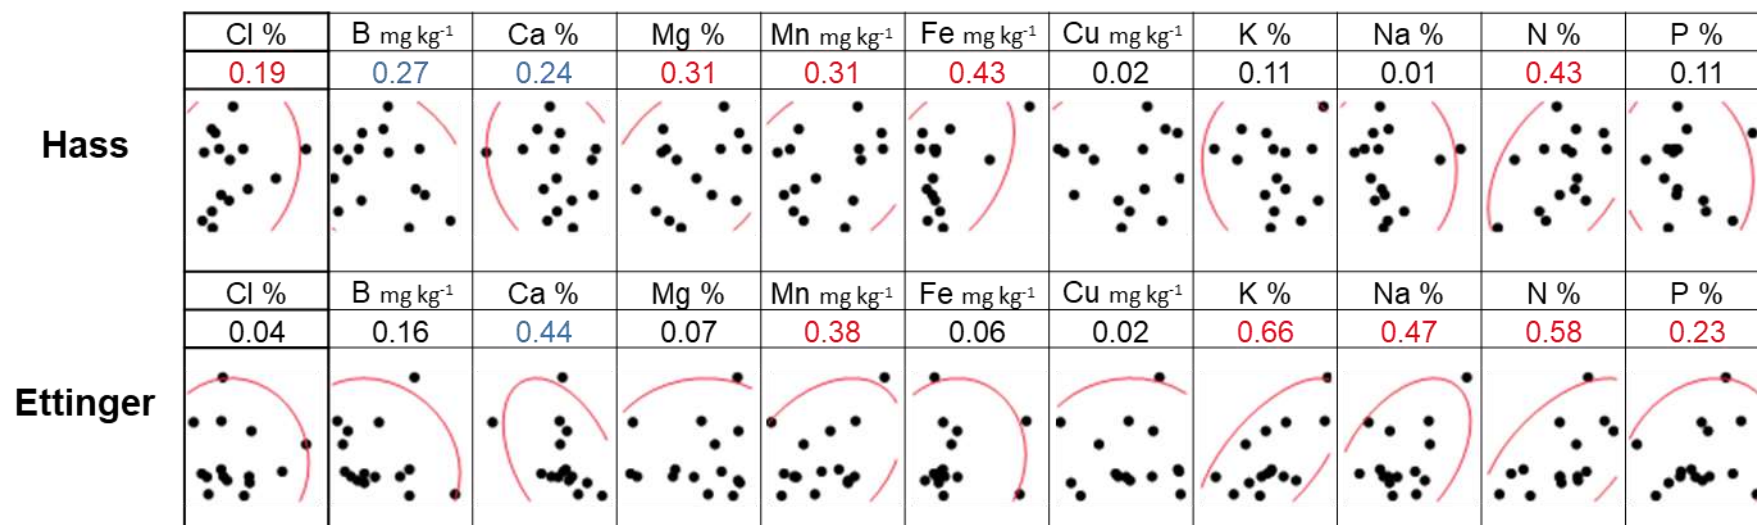

Figure S1. Correlation between the relative change in trunk circumference and 3 years' average levels of minerals in foliage. Each point represents a specific rootstock. Red= a positive correlation, blue= a negative one, black= no significance.
