Data are expressed as Mean ± Standard Error of Mean and analyzed by one-way ANOVA followed by Dunnett's test for each parameter separately. P: Pus cells, E: Epithelial cells, C: Casts, R: RBC, Cr (T): Crystals Triple Phosphate and Sp. Gr.: Specific gravity. Qualitative grade: Absent (0), Trace (+), Small amount of analyte (++) , Moderate amount of analyte (+++) and Large amount of analyte (++++). Microscopic grade: None found in any field (0), Few found in some fields (1), Few found in many fields (2), and Many found in many fields (3). Figures in parenthesis indicate dose in mg/kg. C: Chrys in. C (0)-R: Chrys in (0 mg/kg) reversal treated and C (1000)-R: Chrys in (1000 mg/kg) reversal treated.

**Supplementary Table 9: Effect of chrysin on intake and absolute organ weights of Sprague-Dawley male rats during 90-days repeated dose toxicity study**
