

Supplementary Figure 1

Supplementary Fig. 1. The systemic parameters of the mice.

Body weight of WT/NZW and Sod1^{+/-}/NZW mice (A: 11–15 weeks, B: 30–37 weeks). The levels of plasma (C) ALT, (D) AST, (E) BUN levels, or (F) RBC count in WT/NZW and Sod1^{+/-}/NZW mice (30–37 weeks). Each dot represents an individual mouse. Statistical analysis was performed using unpaired Student's *t*-test; *n.s.*, not significant. Bar, mean.
