

*Supplementary material for Nielsen M. S. et al. A new method to validate thoracic CT-CT deformable image registration using auto-segmented 3D anatomical landmarks, Acta Oncologica, 2015; 54: 1515–1520.*

Supplementary Table I. Patient summary.

Patient	Sex/age	Primary disease	Bulky tumor	CT_a [months]	CT_b [months]
1	F/61	Angioimmunoblastic T-cell lymphoma	None	3	10
2	M/57	Diffuse large B-cell lymphoma	Jejunum	4	18
3	F/52	Angioimmunoblastic T-cell lymphoma	None	5	9
4	M/71	Diffuse large B-cell lymphoma	Delteoideus	3	5
5	M/56	Morbus Hodgkins lymphoma	Kidney	5	10

Patient summary with sex, age at the date of reference CT, primary disease and existence/location of a bulky tumor. The time stamp at CT\_a & CT\_b indicates the elapsed time interval from the reference CT to the subsequent CT acquisition.
