Main Map: The glacial geomorphology of the former Patagonian Ice Sheet between 44 and 46°S: Modern ice extent: RGI v. 6.0, region 17 (Arendt et al., 2017). Outwash plains and rivers adapted from PATICE (Davies et al., 2020). P: Río Pico Ca: Río Caceres C: Río Cisnes PF: Lago Plata-Fontana T: El Toqui N: Lago Coyt/Río Nirehuao SP: Simpson/Paso Coyhaique, and B: Balmaceda outlet glaciers.

Methods

Mapping was undertaken by Emma-Louise Cooper in ArcMap version 10.3.1, and completed with ArcGIS Pro. The Southern Hemisphere WGS-1984-UTM Zone 18S Projected Coordinate System was used. Features were mapped on to an ASTER (v.3) Digital Elevation Model (DEM), overlain with a Hillshade Digital Terrain Model and Slope model. ESRI™ DigitalGlobe World Imagery and Sentinel-2 imagery were used to identify geomorphological landforms. Field surveys validated geomorphological interpretations at a number of locations. Map is presented at a 1:300,000 scale. Final map design was completed entirely in ArcGIS Pro.

Legend

Ice-marginal landforms

- Moraine complex or deposits
- Moraine ridges
- Trimlines
- Cirques

Subglacial landforms

- Crag-and-tails
- Glaciologically-scoured bedrock
- Glacial lineations
- Flutes

Glaciolacustrine landforms

- Palaeolake shorelines
- Ice-contact fans
- Perched deltas
- Glaciolacustrine sediments
- Cols (m a.s.l.)
- Catastrophic flood landforms
- Proglacial outwash plains
- Proglacial outwash terrace
- Meltwater channel (<50m)
- Meltwater channel (50–150m)
- Meltwater channel (>150m)
- Kettle holes

Non-glacial landforms

- Fans and deltas
- Rivers
- Palaeochannels
- River terraces
- Major floodplains
- Lakes
- Ocean
- Landslides or Slumps
- Wetlands
- Modern glaciers
- Main volcanoes
- Towns
- National boundary

Continental Setting: Patagonia including Chile and Argentina and location of study region (black dashed box). Patagonian Ice Sheet extent at 35 ka (grey polygon) from PATICE (Davies et al., 2020). Modern ice extent from: RGI v. 6.0, region 17 (Arendt et al., 2017). NPI: Northern Patagonian Icefield SPI: Southern Patagonian Icefield CDI: Cordiller Darwin Icefield.
